Destination

SUVERETO

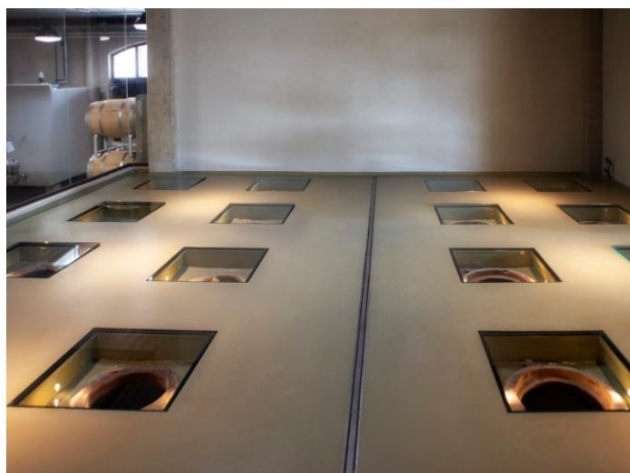

CASADEI WINERY

Visit and tasting

Tenuta Casadei: an international project that follows the Biointegrale philosophy. Respect for the land and biodiversity, a look always aimed at the health of the soil, plants and insects. This is the basis for the estate's wine-growing project. In addition to visiting the winery and tasting their wines, you can make an excursion inside the property, tasting local products contained in a cooler suitable for a picnic. Within the route there are various refreshment points suitable for a stop in the shade of local vegetation. To this is added the possibility of a visit aboard a carriage.

The route to reach the estate starts from Campiglia, crossed in all its countless medieval alleys and continues on a dirt road at high altitude, with breathtaking views of the Tuscan hills and the Tyrrhenian coast. After skirting a stretch of the old quarry "Marmo rosa" you go down to Suvereto until you get, through the vineyards, to the beautiful Casadei estate.
