CAMPIGLIA SUVERETO

SUVERETO CITY CENTER

Excursion with Mtb

Campiglia Marittima is one of the most beautiful villages in Italy, not far from the sea that you can see arriving at the Rocca di Campiglia on top of the village. The village is a constant interweaving of narrow streets and alleys that form a maze where you can get lost admiring its beauty. Suvereto takes its name from the cork plants (*quercus suber*) of which the surrounding woods are rich. It's part of the national circuits of the Wine Cities, the Oil Cities and the Slow Cities. Its area is largely included in the Interprovincial Natural Park of Montioni, where there are marked trails, rich flora and abundant fauna. Both villages are on the top of gentle slopes that enhance the surrounding landscape.

The route starts from the village of Campiglia and passing through the fortress you enter the narrow streets, still enjoying the medieval atmosphere that emanates from every corner or porch. Crossing a hilly road with breathtaking views, we arrive at Suvereto, orange flag of the TCI. Here too, the Middle Ages and stone come together in one. Architecture intersects with history. Excellent wineries and typical restaurants offer quality local cuisine.
