### POGGIOROSSO WINERY

*Visit and Tasting*

The hill on which we are, dating back to 24-36 million years ago, is composed of the galestri of the promontory and the orange red sands of Donoratico that give the name to the estate of Poggio Rosso. Here are planted the varieties of merlot, sangiovese, cabernet sauvignon, vermentino and viognier.

These vines are able to transmit unique characteristics of sapidity and territoriality due to the particular position influenced by the proximity of the sea and the constant winds.

The path to reach the estate, goes through the pine forest of the park of Rimigliano, a stretch of cliff overlooking the sea, a beautiful lawn and the beautiful gulf of Baratti. From the viewpoint of the vineyard you can see the "Two Seas"
