Excursion with Mtb

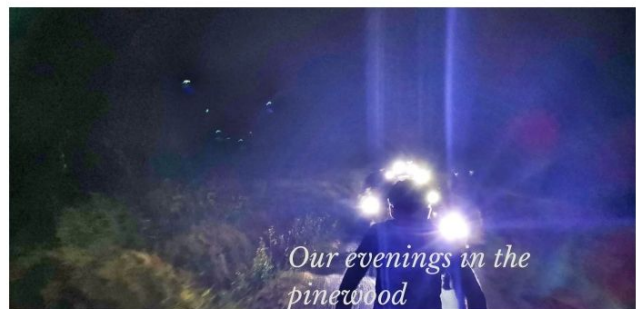

Go out in the evening and have fun in San Vincenzo, which has always been a destination for international tourism, from today it is possible, even without being in the midst of the hectic evening life of the port and the center. We offer you an "alternative" evening immersed in nature with unparalleled views of the illuminated coast. The pine forests that we will cross at night, have a special charm and give a hint of "suspense" to the entire excursion.

The route begins at the location of the rental, winds through the countryside to the south of the village, near some farmhouses, goes into the nearby pine forests, goes up to the upper part of the country and then descend into "single track" simple but intoxicating views. It ends with a refreshing stop in a place of the "movida".
